When the volume exceeds 120 decibels, direct damage can even occur. The chance of hearing damage depends on the listening frequency and duration. Important safety instructions on page 2Na read and maintain all safety and usage instructions. • Do not use high-power headphones for any extended period. - To prevent hearing damage, use your headphones at a comfortable and moderate volume level. - Turn down the volume on your device before placing your headphones in/on your ears, then increase the volume gradually until you reach a comfortable listening level. • Don't use your headphones while driving for phone calls or for any other purpose. • Do not use noise-cancelling headphones whenever the inability to hear surrounding sounds can be a danger to yourself or others. For example, when cycling or walking in or near traffic, a construction site or – remove the headphones, or use noise-cancelling headphones or – adjust your volume, ensuring you can hear the surrounding sounds, including alerts and warning signals. - Pay attention to how sounds you rely on like reminders or warnings may vary in character when used. • Do not use headphones if they emit unusual loud noise. In this case, turn on the or headphones and get in touch. • Remove headphones immediately if you're experiencing a warming sensation or audio loss. • Don't use mobile phone adapters to plug headphones into seat jacks on the plane, as this can cause injury or property damage due to overheating. • Do not use headphones as aviation communication headphones except in case of emergency. - Incoming audio will not be heard with a battery released or not installed properly. This could potentially result in missed communication when flying a plane. - Very noisy ambient noise levels shared by many propeller-powered aircraft may impair your ability to receive incoming audio communications, especially during • and climbing out. - The headphones are not engineered under noise, altitude, temperature or other environmental conditions common in non-commercial aircraft, resulting in possible disruption to critical communications. Contains small parts that may pose a choking hazard. This product contains magnetic material. Consult your doctor if this may hang. • To reduce the risk of fire, electrocution, Do not disclose this product to rain, liquids or moisture. • Do not disclose any unauthorized changes to this product. • Use this product only with an agency-approved power supply that meets local regulatory requirements (for example, UL). • Do not disclose products containing batteries for excessive heat (e.g., from direct sunlight storage, fire or as). Direct damage can even occur. The chance of hearing damage depends on the listening frequency and duration. Owner's Guide Support: Quick Start Guide: Unlock the full potential of your product. Free app compatible with most Apple and Android systems™ easily pair your mobile device with your headphones and easily connect and switch between multiple mobile devices. Disable voice guidelines to keep your headphones up to date with the latest action plan button software. Set up headphone settings such as fast voice language and automatic running time. Premium headphones that include the industry-leading Bose QuietComfort 35 II or Bose QC35 II NC were released in 2019. Bose QuietComfort 35 II Specifications Dimension and Weight: 7.1 H x 6.7 W x 3.2 Inch D (8.3 oz) Audio Cable: 47.2 USB3.2 Battery Cable Life: 20+ NFC: Yes. Bose QuietComfort 35 II Review: These headphones have good build quality. Comfort, sound quality and noise cancelling actually now build quality is just fine here it's almost identical to QC25 there's a fairly light pair of plastic headphones built quite flexible and that's basically what makes them so comfortable that they're so light and flexible and along with super soft foam on the top strap and the super soft leather ear cushions go over your ears it all fits together to make them really comfortable. QC35 II are only a little heavier than QC25 since there is now a small rechargeable battery in them now but you probably don't notice that when wearing these headphones for long periods of time as a long flight is still not a comfort issue is a huge advantage for those now since they are wireless you have some other things to worry about and these are the controls And the battery life controls have gone from the internal wire and microphone on both buttons of the QC25 at the back of the right ear here and they are all the same so the activation/lag controls the up and back volume skipping tracks etc and they are all quite touch quality buttons which is important when you press them blind. Battery life is also top of the line now I've only got these for the last few days over the last week or so but the active 20-hour battery life seems to hold up now every time you turn them on it tells you when Bluetooth is paired and it also gives you the battery percentage of what's left so when I turn it on last I had 63% so I feel like I can finish the weekend with a lot more heavy listening of these and not it needs to be loaded by the end of the week so it's good and I feel like if you can listen to a pair of headphones for the whole week and charge it once a week with a lot of heavy listening you pretty much don't have to think about it so much with these now sound quality is pretty much just like QC25's which is pretty much a pretty good say but nothing spectacular is anything that's going to blow your mind at all it's just like a normal pair of Rear headphones you don't buy these two monitors for music production or anything like that. Looking for a pair of premium Bluetooth noise-cancelling headphones? Here's my review of Boss's QC35. They are undoubtedly very vibrant and color comes with a wire in the box at the bottom of these headphones you have a micro USB charging port on your right ear as well as you get this mini cable and a 3.5 millimeter headphone jack on your left ear. Bose makes it pretty much better than anyone else it's kind of what they best have microphones as you can see all over the outside of the headphones pick up noise and external frequencies and just cancel them so if you've heard noise cancelling headphones before you know exactly what I'm talking about it's great for flights it's great for noisy environments trains buses basically whenever you want to cancel the outside world and just hear the outside world your audio just listens. For your music isolated I mean that's why you're buying noise-cancelling headphones in the first place. This choice is good for noise cancelling wireless headphones. Bose QuietComfort 35 II PDF User's Guide: Bose QuietComfort 35 II User Guide was written in English and published in PDF. You can get the important information of Bose QuietComfort 35 II with its user guide, user manual and instruction manual.
